

Life Cycle Management Program

Our Life Cycle Management Program was created to provide customers with a rotating supply of high performing bakeware and coatings resulting in optimal operational efficiency and product quality.

Process

1. Purchase Bakeware

New tins and trays are purchased for use at your bakery and for rotating supply kept at one of our refurbishment facilities. Bakeware can be purchased from one of our standard bakeware catalogues or be a custom item.*

*Minimum quantities apply.

2. Scheduled Service

At scheduled times, our dedicated fleet will pick up your used bakeware and drop off tins and trays from your purchased stock.

3. Ready Supply

The used bakeware is brought to our designated facility to be inspected and straightened (optional), cleaned, and recoated so that they are ready to deliver on your next scheduled pick-up date.

Key Benefits

- **Reduced Costs:** It has been proven that this service will reduce your operating costs by 15-40% due to reduced oil and parchment paper usage, tin/tray discarding, etc.
- **Increased Sustainability:** Make a positive impact on the environment by reducing oil and parchment paper usage and extending the life of your bakeware.
- **Increased Efficiency:** The continuous cycle ensures that your bakery is consistently operating with bakeware at optimal performance.
- **Improved Product Quality:** Clean and hygienic bakeware results in improved product quality and reduces the need to throw away products unworthy of selling.
- **Dedicated Inventory:** Your bakeware inventory ensures that we can replace old, worn out tins and trays in a timely manner and that your bakery will always have the right amount of bakeware needed to produce high-quality products.
- **Dedicated Account Manager:** With the help of a single dedicated and knowledgeable account manager, your bakery will receive the support and guidance that it needs.
