

OptiShield® Coatings

Our OptiShield® fluoropolymer coatings have been developed to provide a durable solution for conditions where a standard coating will not perform. Whether you have an extremely sticky dough or extreme temperatures, we have a formulation that will work for your operation.

The Quality of OptiShield

- **Consistency:** Our state-of-the-art robotics system ensures absolute coating consistency.
- **Quality Control:** An on-site chemical engineer and quality control and process experts implement a 100% inspection procedure ensuring optimum consistency during the entire coating process.
- **Durability:** OptiShield delivers a finish that is significantly more durable than other non-stick coatings.

The Benefits of OptiShield

- **Superior Product Quality:** OptiShield provides excellent dough flow which produces a beautifully browned, perfectly baked product.
- **Increased Yield:** Products baked on OptiShield coated pans release effortlessly, even in the most extreme conditions, which significantly reduces waste and damaged product.

The Value of OptiShield

- **Extended Release Life:** OptiShield formulas are expertly formulated for specific product to ensure the longest release life for the respective product.
- **Cost Effective:** In many high-volume operations, OptiShield coating can pay for itself in less than one year.
- **Improved Sanitation:** Release agents and oils typically used to enhance release are unnecessary.
