

SMART Pan Tracking® System

The American Pan SMART Pan Tracking® system* provides bakeries with valuable, precise data to monitor pan coating life and line efficiency, allowing continuous improvement.

SMART Pans

Using a locking design, tags are permanently attached to pans before leaving the American Pan factory. Basic pan data such as dimensions, mould size, and coating life expectancy is entered into a database.

SMART System

Pan sensors and tag readers are installed on existing bakery equipment and connected to HMI which sends information to a secure database which is used to create usage and performance reports.

SMART Data

A password-protected website provides you access to review data, run analytics, and download metrics critical to your bakery's success.

- **Line Activity:** Number of cycles/bakes and gaps in line activity.
- **Pan Coating Life:** Pan coating life displayed with intuitive color-coding for at-a-glance review.
- **Product Yield:** Theoretical yield calculated based on line activity. Comparing this to actual yields can reveal scrap, lost product, or productivity shortfalls.
- **Line Efficiency:** Pan gaps, or the time between two pan readings, summarized to provide insight into line efficiency.

*E.U. and U.S. Patents Pending.

Continued on reverse.

BUNDY BAKING SOLUTIONS:

Baking Pans

Pan Coatings

Release Agents & Applicators

Refurbishment Services

Optional Features

The SMART Pan Tracking® system can be configured to your bakery's specific needs:

- **Dual Tags:** Pans can feature single or dual tags for optimal performance for your specific conveyor configuration.
- **Multiple-Line Data:** Data from multiple lines can route to a single PLC.

Tags permanently attached using a locking design

SMART Pan Tracking® System: Key Benefits

Monitor pan coating life and line efficiency with the American Pan SMART Pan Tracking® system. Smart pans feature a permanent tag with a unique code that is read by sensors installed on your bakery conveyors which upload activity data for review.

- **Data at Your Fingertips:** Get detailed information on cycles/bakes, pan gaps, coating life, and theoretical yield.
- **Intuitive Dashboard:** Visualize data with charts, graphs, and analytics.
- **Mobile-Friendly:** Access convenient and secure vital operational data nearly anytime and anywhere.
- **Compatible with Existing Equipment:** Use the system in virtually any operation and for any pan type.

Access vital and secure operational data nearly anytime and anywhere

User-friendly SMART Pan Tracking® system interface

Visualize data with charts, graphs, and analytics

Improve productivity and product quality

Stainless steel tag securely locked into pans

Integrates with existing bakery conveyor system
