

CleanEdge™ Pan Band

The CleanEdge™ Pan Band* from American Pan features a proprietary band design engineered to help minimize water retention and protect against moisture-related issues. Built with corrosion-resistant, high-strength materials, CleanEdge helps extend pan life through repeated wash cycles.

Enhanced Water Protection

Pan material is crimped around the band to create a tighter closure, reducing the amount of liquid trapped in the pan rim during wash cycles, minimizing moisture exposure, and supporting longer pan life.

Corrosion-Resistant Materials

Available with aluminium or stainless steel bands, CleanEdge provides enhanced corrosion resistance for long-lasting performance. Material selection can be tailored to the bakery's production environment, handling practices, and performance requirements.

Built for Performance

Designed for bakeries that require frequent pan washing, the CleanEdge pan band provides the strength and durability needed to withstand rigorous bakery production environments.
