

DuraShield® SureBake

DuraShield® SureBake is specifically formulated to reduce white rings and large pores found on the bottom of hamburger buns from the very first bake. SureBake also has exceptional release characteristics and overall coating life.

Eliminate White Rings & Large Pores

Special DuraShield SureBake formula reduced white rings and large pores found on the bottom of regular hamburger buns from the very first bake on the pan.

Excellent Release

DuraShield provides the world's longest release life, delivering more releases than all other competitors worldwide. Bakeries can expect up to 3500 releases with SureBake.

Extend Pan Life

We've perfected the process for cleaning and recoating baking pans through 40 years serving some of the world's largest and most demanding bakeries. Our exclusive methodology and coatings prolong pan life and restore optimal performance. Recoating of DuraShield coated pans is available in Brazil, Mexico, Romania, Spain, UK, and USA.

SMART Pan Tracking® System

The American Pan SMART Pan Tracking® system provides bakeries with valuable, precise data to monitor pan coating life and line efficiency, allowing continuous improvement. Pans are laser-marked with a unique code that is read by sensors installed on your bakery conveyors which upload activity data for review.
